David

DNR lists Glacier Northwest under permit #70010170, see:
http://www.dnr.wa.gov/Publications/ger_ofr2006-1_surface_mine_directory.pdf

Approved acreage: 117 acres
Approved depth: 170 feet

I question the 170 feet, but this would require research with DNR.

After the 2007 EIS

Glacier applied for a Jaw Crusher Type I permit for changing out the crusher on the plant.
Then in 2008 a SDP for repairing the base plates on the barge landing.

Basically, they slowed down significantly, but I would suggest they are waiting for improvements in the market.
